REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art did not disclose or suggest a water containing segment or a water and shock absorbing material combined with rotatable beads that are elastic and a support body with a support frame.

Additionally, as stated in the office action with a mail date of 06092005, Examiner considers claims 9 and 13 patentable over the prior art of record because Examiner considers the water containing segment to contain water as opposed to being capable of holding water. Also, claims 10 and 14 are patentable over the prior art of record because Examiner considers the water containing segment to contain water as opposed to being capable of holding water and the defined space to be within the water containing segment. Finally, claims 11 and 15 are patentable over the prior art of record because Examiner considers the water and shock absorbing material to be both a water material (that is containing water) and a shock absorbing material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lazor and Cousin et al. disclose in the prior art or art various structures with beads.
